**"A storming LP from The High Rip. Some really nice lyrical twists and an abundance of hooks. Well worth checking out!"**

*Ade Blackburn, Clinic*

Ivan (vocals/guitar), Graham (guitar), Jo (drums) and Paul (bass/vocals).

Named after the most notorious street gang of Victorian Liverpool, 'The High Rip' formed in 2017. Early gigs and rehearsal rooms were located in that gang's old stomping ground and the synchronicity was unavoidable. United by their shared love of post-punk and new wave artists, their songs combine the high drama of Joy Division and the pop sensibility of XTC.

**"This is Rock & Roll revitalised. It's easy to see this is no throw away pop crusade. Things that are made into song are cared for, not just sang about. Their music is bigger than the band."**

*Scene and Heard*

**"This is a record that sits perfectly between The Damned and Echo & The Bunnymen, The Adverts and Gang of Four. This is a record everyone needs to listen to, so please go and check out Rule of Four."**
